AWS IAM Creation guide

AWS IAM User Creation with Access and Secret Key

- Open your AWS Management Console and navigate to AWS IAM (you can search for "IAM" in the search bar).

- Navigate to IAM, where you'll land on the page below. Here, you'll create the necessary users in AWS..

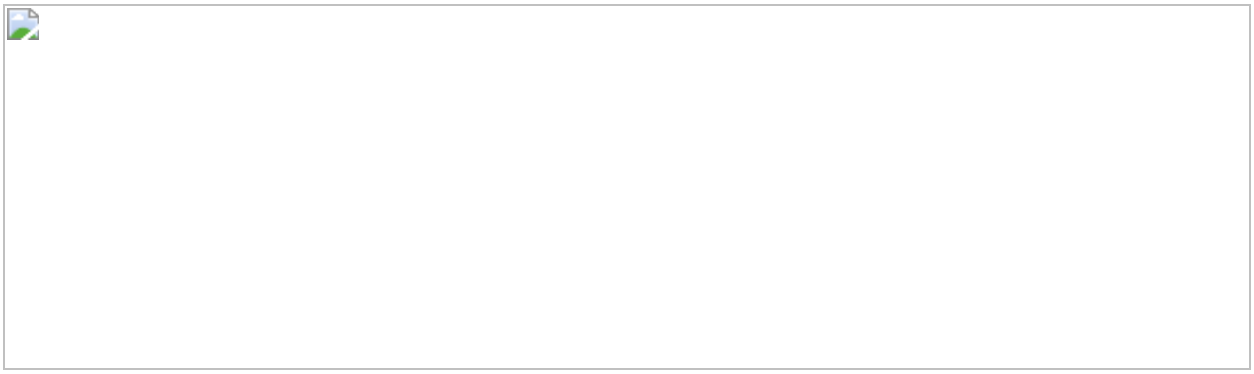

- Navigate to the “Users” button located on the left-hand side of the page,and click it to open.

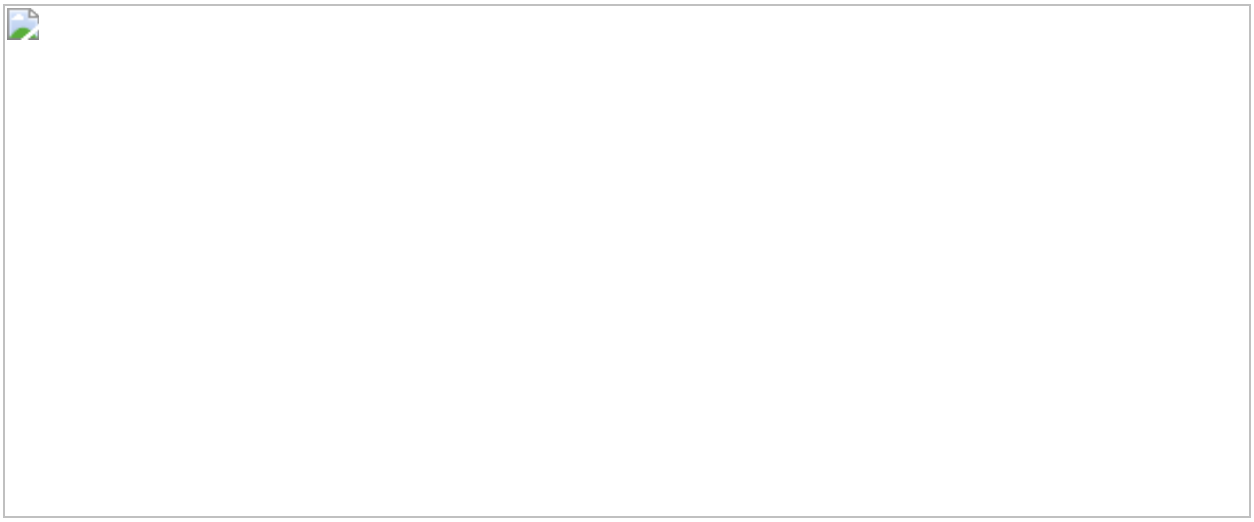

- Next, click on the "Create user" button.

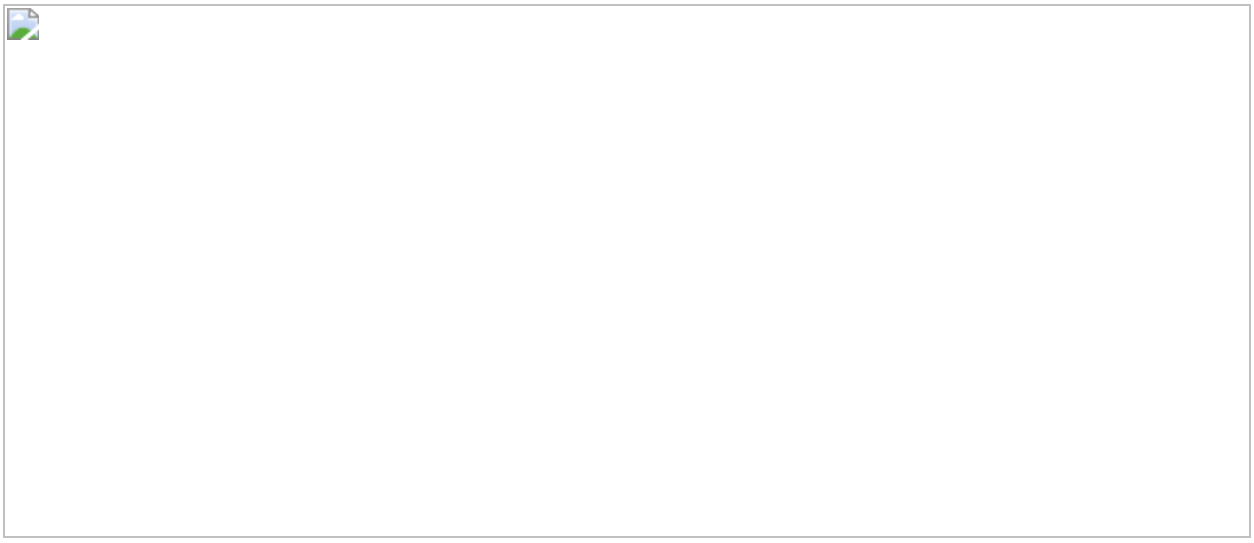

- Give an appropriate name to the user (scd1user) on the Next page and then click Next button.

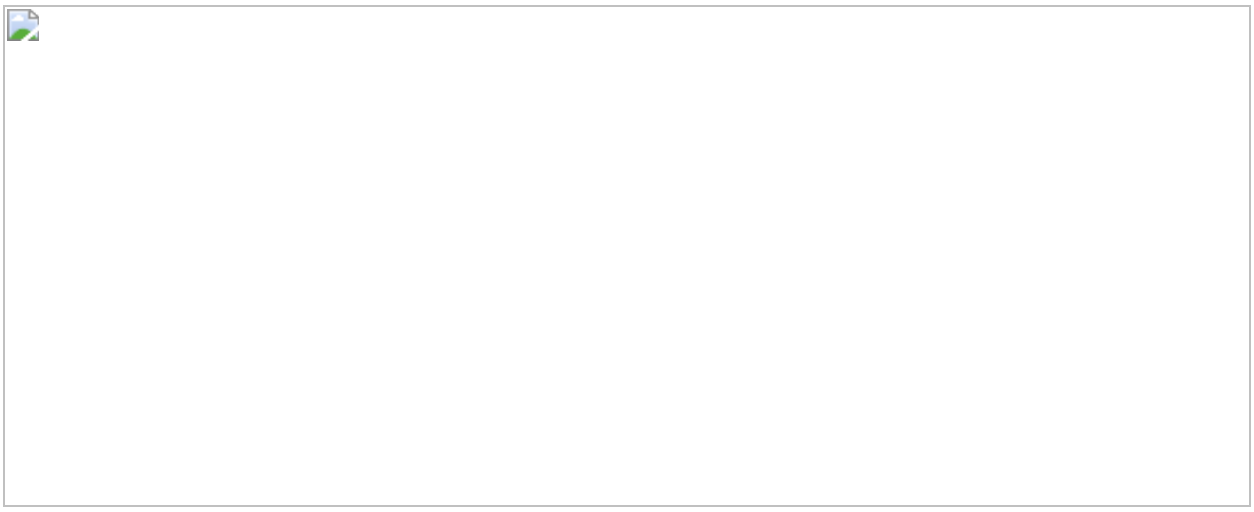

- On the following page for Set permissions, please select the Attach policies directly option locate the below listed policy and select it and then Click Next button
- AmazonS3FullAccess

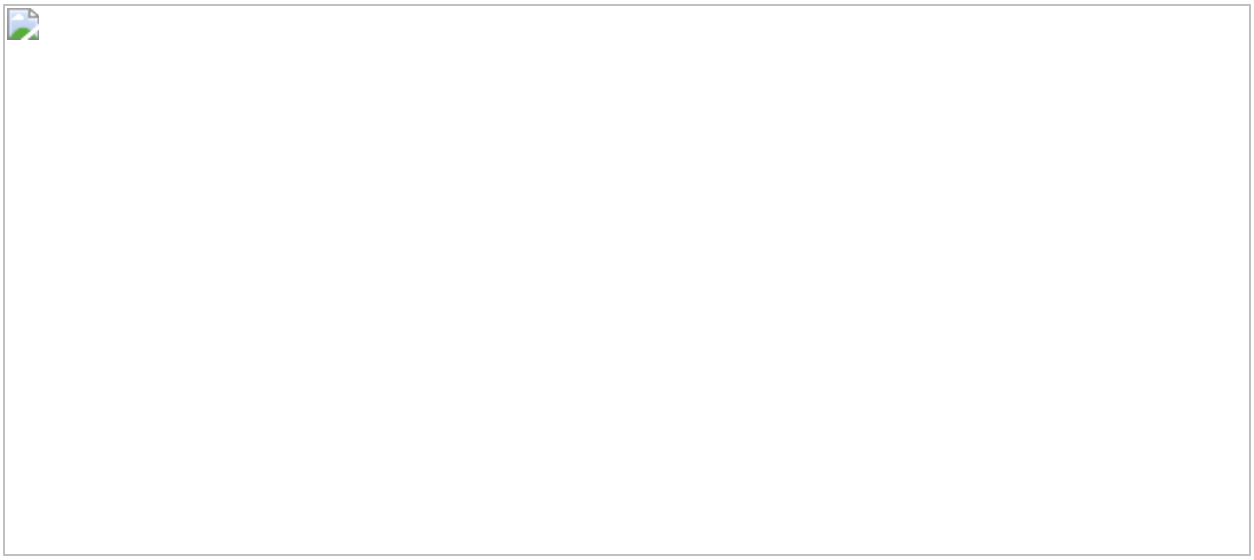

- On the next page, please review you details and click Create user button to create this new user

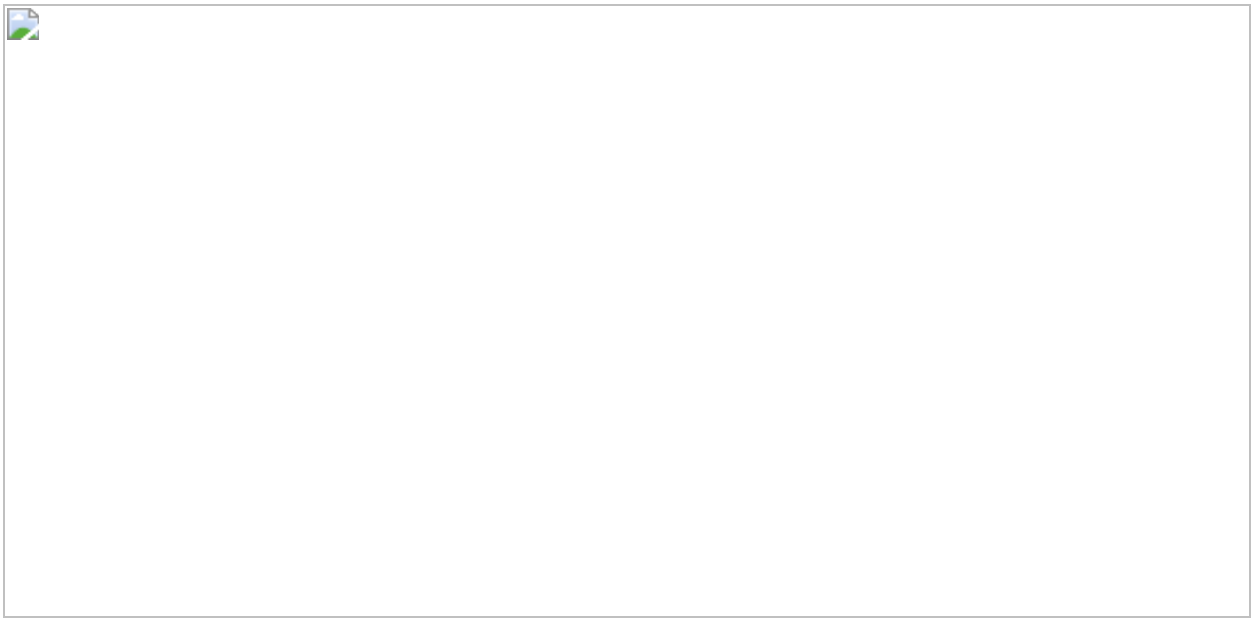

- Your new user for the scd1 project is successfully created.

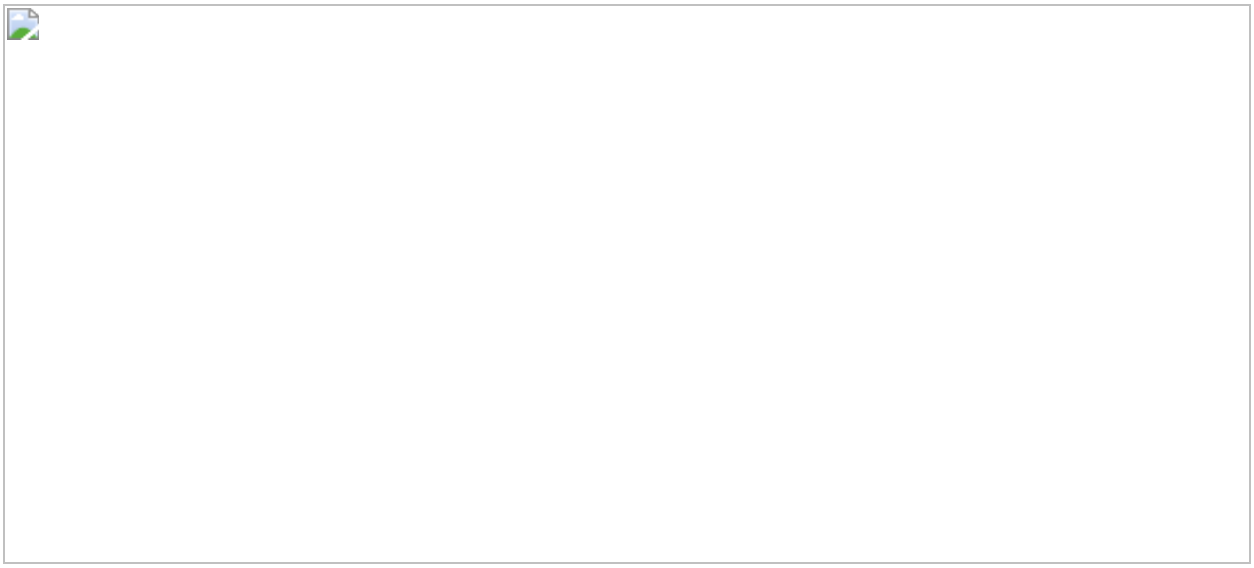

- Open the newly created user by simply clicking it and click the Security credentials button on the next page.

- Scroll down on the same page to the Access Keys section and click on the Create access key button.

- Select the Command Line Interface (CLI) option under the use case on the next page. Also check the confirmation option and then click the Next button.

- Under the Set description tag section on the next page, leave it blank and click Create access key button

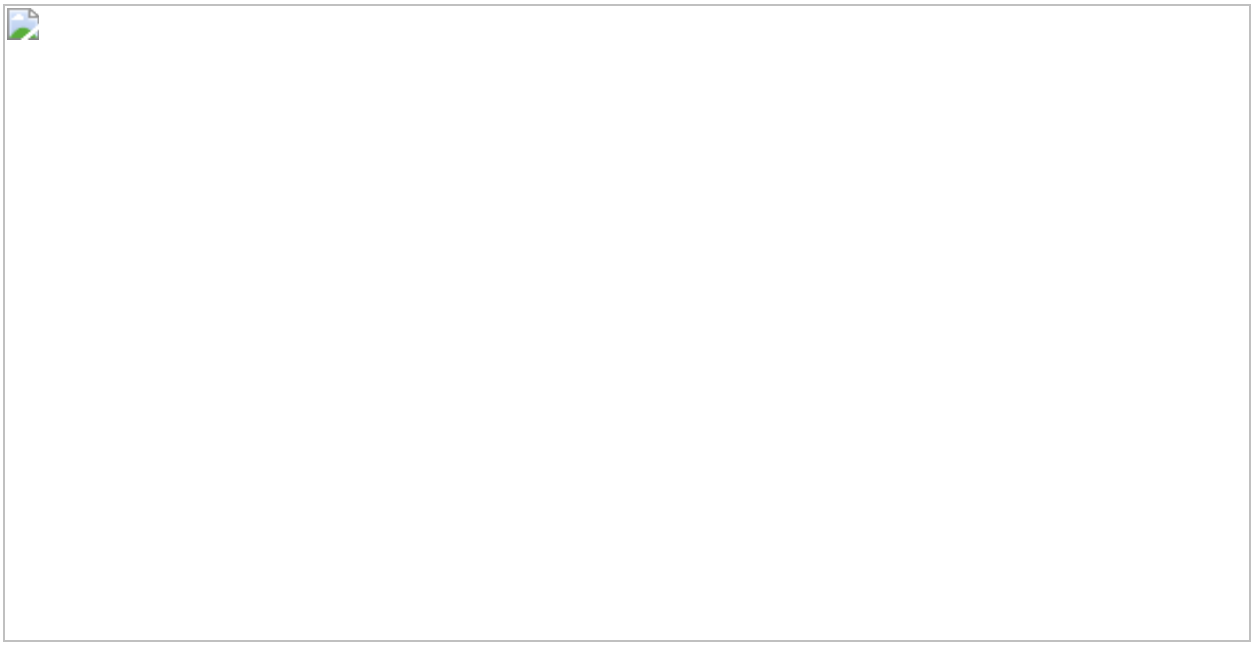

- On the next page, first click on the Download .csv file button to download the access and secret key of this user for the future reference.

- Once you downloaded the file then click on the Done button.

- You have successfully created a new access and secret key for this user to access the AWS through your python code for this project.

VOILA! YOU HAVE SUCCESSFULLY CREATED YOUR AWS IAM USER WITH ACCESS AND SECRET KEY
