Technical Overview

In this document, we are going to set up stream in snowflake to capture any new data from the customer source tables for the next processes

Architecture

Pre-requisites:

- Snowflake Account

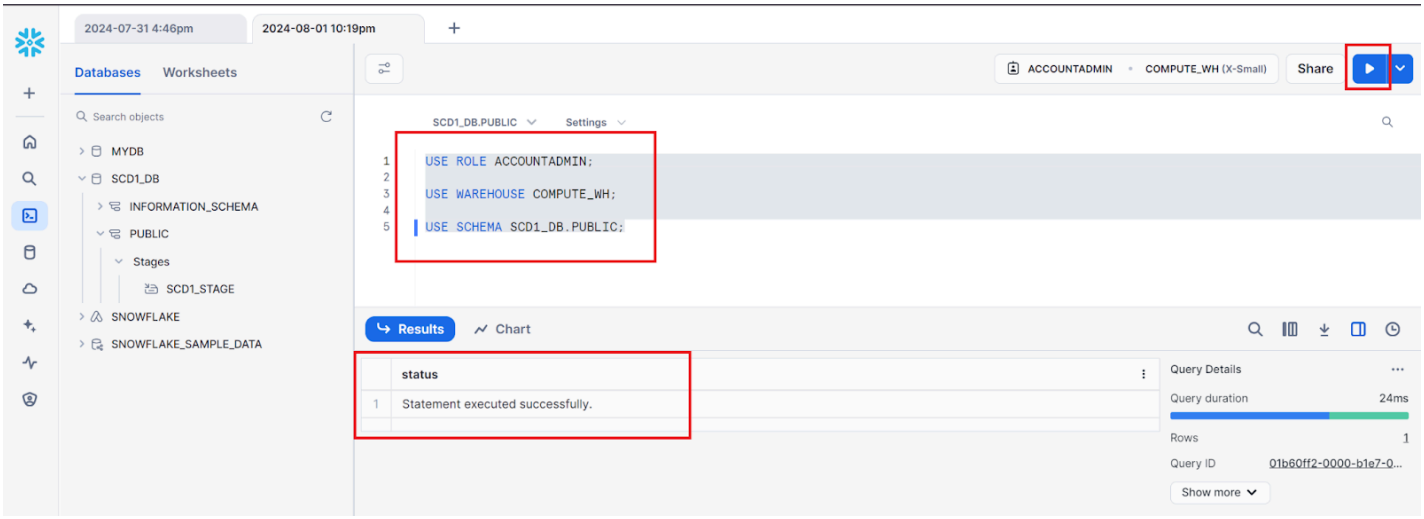

Create a Customer Source table stream in Snowflake

- Go to the snowflake console and open the already opened SQL worksheet page (if not opened, open a new SQL worksheet) and execute the below SQL statements to select your role,warehouse and schema accordingly by clicking the play button on the top right corner

```
USE ROLE ACCOUNTADMIN;

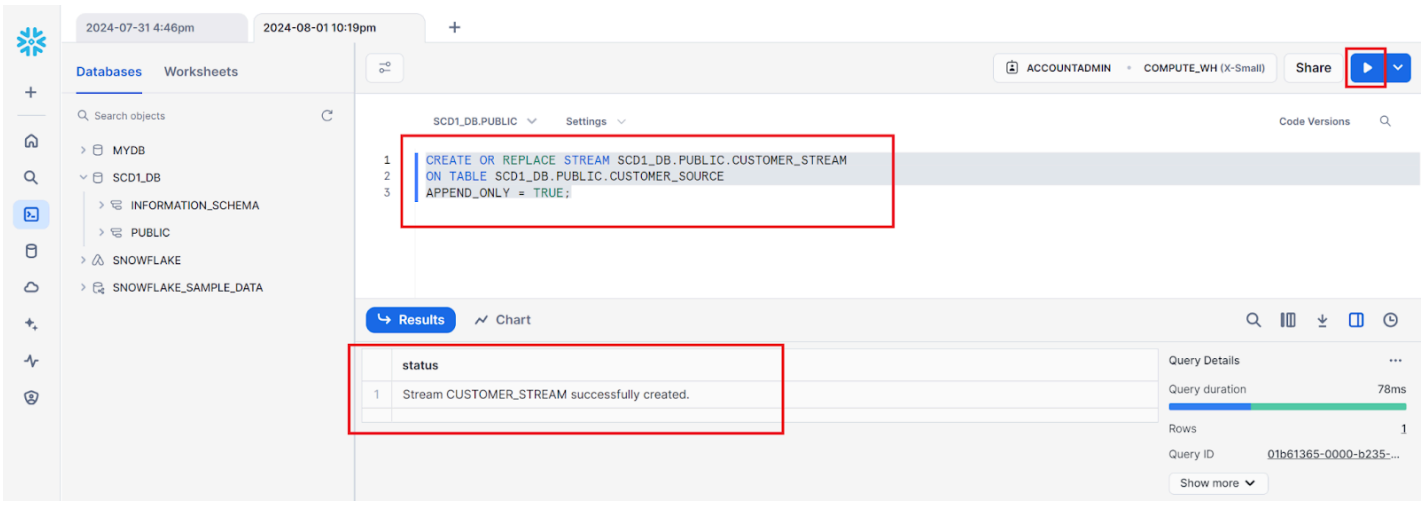

USE WAREHOUSE COMPUTE_WH;

USE SCHEMA SCD1_DB.PUBLIC;
```

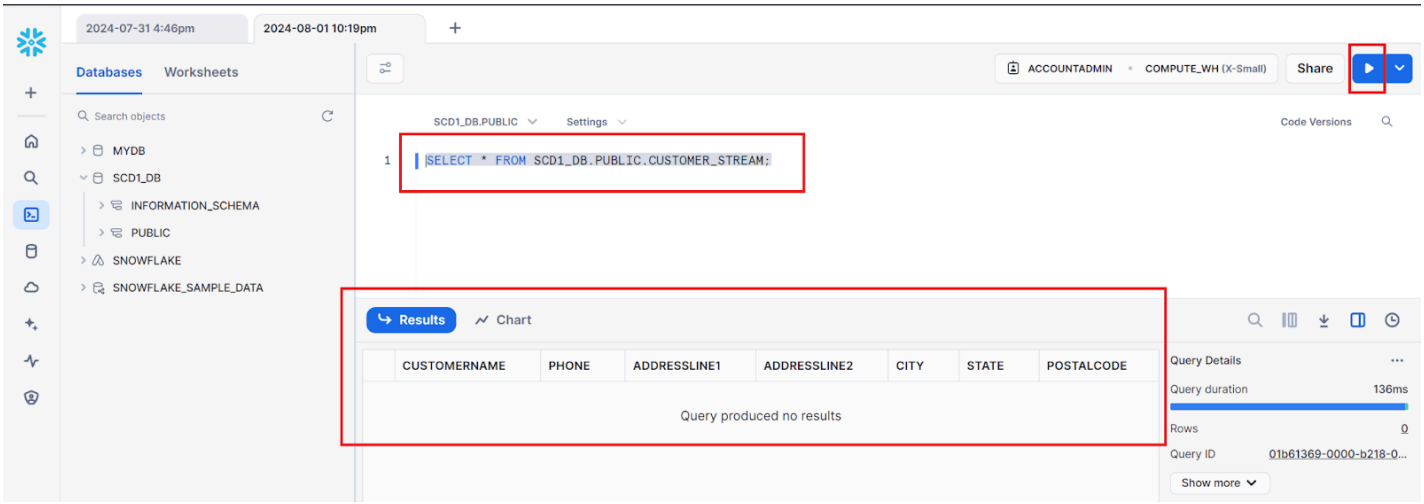

- Execute the below code in the snowflake worksheet to create a stream on top of the customer source table.

```
CREATE OR REPLACE STREAM SCD1_DB.PUBLIC.CUSTOMER_STREAM
ON TABLE SCD1_DB.PUBLIC.CUSTOMER_SOURCE
APPEND_ONLY = TRUE;
```

- Once the stream is created, please execute the below code in the snowflake worksheet to validate that the required stream is successfully created

```
SELECT * FROM SCD1_DB.PUBLIC.CUSTOMER_STREAM;
```

VOILA! YOUR SUCCESSFULLY CREATED THE SNOWFLAKE STREAM TO CAPTURE THE CHANGE DATA
